

01 Profile

Data and analytics leader with 9+ years designing and delivering analytics, reporting and data platform solutions for Australia's largest mining and resources clients. I work end to end, from data pipelines and modelling through to reporting, governance and the operating models that keep analytics capability sustainable. My foundation spans Power BI, SQL, Python and modern platforms including Snowflake, Azure SQL and Microsoft Fabric. I currently lead EY's national Risk Analytics practice across Oceania, with concurrent product work on a Snowflake Native App.

02 Experience

PERTH

Director · *EY, Risk Analytics*

I lead EY's national Risk Analytics practice across Oceania, grown from 3 to 16, owning practice strategy, commercial performance, capability and the delivery of our largest analytics, payroll compliance and continuous controls engagements in the mining and resources sector.

- Built Power BI reporting and payroll monitoring solutions for Tier 1 mining clients, giving leaders ongoing compliance visibility across the hire to retire process.
- Developed payroll monitoring backed by SAP ECP, SuccessFactors and Pronto, integrated through Snowflake, improving how workforce compliance risks are surfaced and managed.
- Led 20+ superannuation compliance reviews, identifying material exposure and guiding remediation alongside the ATO and Fair Work Commission.
- Implemented continuous controls monitoring across payroll, master data, leave and rostering, strengthening data integrity and audit readiness.
- Established digital analytics capability for a global internal audit program spanning 100+ countries and 50+ audits a year, setting strategy, standardising methods and deploying scalable tooling.
- Designed and delivered analytics on Azure SQL with Power BI, embedding data governance and validated findings processes.
- Built a modular risk and controls analytics platform on Azure SQL using a layered ref / active / archive design, reusable across multiple client engagements.
- Designed reusable data models and ETL pipelines integrating SAP, Snowflake and Power BI, cutting per engagement build effort and improving data quality.
- Grew the Oceania practice from 3 to 16; designed the operating model, built a structured training program and led the AI adoption and responsible use program.

CONCURRENT WITH EY

Senior Account Executive · *Unified Honey*

Founding contributor to a Snowflake Native App in the Snowflake Startup Accelerator, focused on governed, agent ready data products that bridge ERP systems with modern data platforms. I work across product strategy, go to market and data governance framework design.

- Lead go to market strategy, product positioning, sales collateral and competitive analysis for a Snowflake Native App targeting mining sector data governance.
- Contribute to data governance framework design including lineage, quality rules and semantic definitions for agent ready data products.
- Bridge ERP systems (SAP, Pronto, Oracle) with modern data platforms, drawing on mining industry domain expertise.
